

# Review: The Ovum Factor by Marvin L. Zimmerman

*April 23rd, 2008 · Post written by Jason*

Sadly, I don't get much of a chance to sit and read these days, but despite my schedule I was finally able to sit down and enjoy Mr. Zimmerman's novel The Ovum Factor . I absolutely enjoyed the book and my only regret was I started reading it at 2 am and didn't put it down until about 6 am with my mind wandering in and out of the storyline just to pick it up later the next day. He really has a way of bringing you into the main character David Rose's journey.

Before this book I had no idea the genre "Eco-thriller" existed and now I'm glad I know. To express the urgency of our environmental issues through fiction as well written as this book is a great way to increase awareness to the masses. I eagerly await to see what Mr. Zimmerman comes up with in his next novel.

Since I'm not such a great book critic I found a couple more in depth reviews you may enjoy by Eco-Libris and BookPleasures . Also, Rebecca at her blog the Paperback Writer was lucky enough to score an interview .

**Disclaimer:** This book was sent to me free of charge by the Mr. Zimmerman's publicist Phenix & Phenix. This is no way swayed the review or even forced me to write the review. I am no book critic as you can no doubt tell, but I really believe this book is worth picking up and giving it a read.
